NSC-29

1. As a result of NSC-29, CIA is responsible for responding to State Department requests for investigations of the security of foreign industrial facilities abroad and covert surveillance.

2. Status: All requests for investigations have been honored with report and recommendations. There has been a single request for surveillance by covert means and this has been accepted by CIA. I see no need in view of the development of this program and the minor burden which we have incurred for altering the present obligation or manner of dealing with that obligation.
